

Mods for transformer compatibility suggested by MF
 change operating current to 2mA
 change R4 to 1k5 to preserve 3V at Q1 source
 add Rnew01
 possibly D2 (E102 CC diode) instead, higher impedance

unless marked otherwise:
 microfarads/volts
 ohms

		RT-011-Schoctava-mfmod	Modified version of Henry Spragens' Schoctava circuit for Oktava MK-011 with mod for voltage balanced o/p
TITLE		FILE: rt-011.schoctava.mfmod.sch	REVISION: 1606102555
