

R4 and R5 can be 1G resistors if convenient.
 If head amp does not have input capacitors,
 C8, C9 can be fitted for on-board coupling to head amp.

for +60V only	for +60V and -60V	for +60V and +120V
omit C6A, C6B, K1, K2, D3, D4, C7, R4 (for -60V, D1 and D2 can be reversed.)	fit C6B omit C6A fit link K2 omit link K1 reverse D3 reverse D4	fit C6A omit C6B fit link K1 omit link K2
